Go to menu File>Open>Select Autocad 2008 and click Open. Select Publish your version of Autocad using the AutoCAD-Keygen and select Continue. Click Generate and wait for a long time. If your PC is powerful enough, you may skip the Generate step and click Run. Notes: The keygen is used to create a key. The only reason that you may need a key is if you are upgrading from a previous version of Autocad, or if you are sharing a laptop with someone and they do not want to use your licensed copy of Autocad. If this is the case, you may want to purchase the key and use the old version of Autocad for free. A: If you download the software from this link, you can find the key in the folder "wfh/exp/1009020" A: To keep Autocad 2008 free you can use one of these: KeePass - helps you manage passwords in a secure way. It generates key files, even if you don't own your copy of Autocad. It works great. Passkey - It allows you to use your Autocad 2008 registration key on a standard copy of Autocad 2008 as if you were using your own copy. You can change your registration key, and when you re-install Autocad 2008, you can re-enter your registration key. This makes it easy to use Autocad 2008 on a laptop that is shared between several users. Passlock - Automatically allow you to bypass the license check when using Autocad on a machine that is using the registration key you want to use. With Passlock you can still use your copy of Autocad 2008 the way you would if you owned it. However, it lets you work on your project freely. You can still work on your project as long as no one else is using your copy of Autocad. If you wish to prevent others from using your copy of Autocad, you can lock it by selecting the keyfile, then hitting CTRL-L. For more information on these, see:
