===== Dentist Assistant is a tool that aims at helping dentist business to make their everyday-practises more efficient. The goal with Dentist Assistant is to enable you and your business to stop doing routine tasks manually by automating these tasks to varying extents. Also, by storing much information electronically and, hopefully, having an easy-to-use interface to add and retrieve this information, the element of human

error may be reduced. Of course, Dentist Assistant cannot help you to eliminate human errors that may occur when interacting with the system. Here are some key features of "Dentist Assistant": [?]

Automating and customizing the process of summoning patients.

That is, the process of scheduling appointments with patients such that they can come to your office for a check or a treatment. [?]

Registering information about treatments [?]
Registering information about payments [?]

Accounting information. You may view accounting statistics for your firm in various forms, based on the treatments and payments you have registered in your system. [?] Export business-data from your system to customized excel-templates. The exported data can be used directly in your archives, or may form the basis of advanced report documents. Limitations: [?] Some features are disabled. October 2, 2018 1.0 Description

What's New in the Dentist Assistant?

[?] Provides patient scheduling as features like this are out of scope for this project. [?] Will be written in Java with JPA (if required).

Tiger Woods will be ready to play and 100 percent healthy by the Masters, according to his physician. Woods missed a cut at the AT&T National in March and was inconsistent for much of the

year. A month after his "problem" was found and he began an aggressive treatment plan, Woods finished T13 at the PGA Championship. He was then sidelined through the fall with a back injury that was described by doctors as mild and the worst-case scenario was a six-month recovery. Woods has never been healthier and is 100 percent now, according to his medical team. That was made clear at the World Golf Championships-Bridgestone Invitational. He is now more

motivated to earn his first green jacket. "I'm feeling good about my game right now," he said. "I've been working hard and I'm excited to get back out there." Woods is skipping the cut in his third start of the season. Instead he will be taking part in a practice round with the field on Wednesday. He is also scheduled to play at the Bridgestone Invitational in Ohio on the weekend of June 18-20. With Tiger's father Earl and swing coach Hank Haney on board, Woods looked far more comfortable this

week. His short game was smooth, and he hit his fairways at a high rate of success. He didn't miss any putts, he just missed most of them, but he also had a lot of opportunities to shoot below par. The greens were perfect and he made them look like they were close to being average. "It felt good," Woods said. "It felt like I played great, but you know, you only know that when you play well. In the future, you're going to know after you win." Woods was in a tournament for the first time in six

months and he was just fine. For the first time since last July he had a strong putter and he made strong swings with his driver. "I know I'm capable of playing well out there," he said. "I know I can shoot low rounds out there, so I know I can do it. The first two rounds I was just getting around the golf course and getting into holes. But the third and fourth rounds I was just getting to the good ones and being able to hang in there." Woods didn't have a tournament on the schedule until late January but his game improved

during the Masters. "I felt I played well at Augusta," he said. "I had a lot of fun that week and I kind of got more comfortable playing against the guys on

System Requirements:

Windows 7 or later 2 GHz Intel
Core 2 Duo processor or equivalent
1 GB RAM 1 GB available hard
disk space 3GB available graphic
card memory DirectX 9.0c
compatible video card with 256MB
graphics memory Linux (Ubuntu
version 15.04) Other OS
