March 22, 2021 â€” faycomp d868ddde6e netber says: Jan 30, 2022 at 2:05 am. I bought myself a new computer with ssd. During the installation of windows 10 on a new ssd, the system could not boot and gave an error. I deleted all partitions on the hard drive and decided to reinstall. Now windows is not installed and gives an error 0x80070017. I need help, I can't figure out what the problem is. I tried different installation methods: from a flash drive, from a disk, from a bootable USB flash drive, from a boot disk. I installed windows 10 on an old computer, also with ssd, but with a regular hard drive.
