## Cadence Ncsim Crack [BETTER]

I have a string assertion: `assert property( @(posedge clk) A |-> B );` When I run this on Cadence I get that the assertion failed. Looking at .c file, I see that this statement uses a variable called 'posedge clk'. When I create a new project it works fine. This is strange. As soon as you start looking at the C.c file it says "Assertions are not supported with a cadence assembly". Although I see "A|-> B " being used at the start of this statement. I also noticed that the C.c file says that `A |-> B |-> C |-> D` cannot be used due to assertion restrictions.
