KEYMACRO is a free tool designed to use macros in your Windows 7 and/or Windows 8.1 operating system. KEYMACRO enables you to define a sequence of keystrokes that can be created to perform a certain task. Then, by using the application, you can assign a shortcut that will be executed when you press the keyboard's key combinations. In other words, it can be defined that the keyboard combination Alt+Ctrl+Shift+X will trigger the execution of any macro you've created. Furthermore, while creating macros, you'll be able to see the result, the sequence of steps, and the currently selected key. Macro creation is very easy and intuitive, so it doesn't require any prior knowledge of technology. Also, once it has been created, the software enables you to

edit it and view the results of such an edit, which makes the entire process more enjoyable. Keyboard macro creator KeyMACRO works on both Windows 7 and Windows 8.1, but on Windows 7 you'll need to install additional software to make use of the application's full potential. It's available for both 32-bit and 64-bit versions of Windows. KeyMACRO allows you to create keyboard macros for a number of actions. They are as follows: ▶ Send messages or emails to specific contacts; ▶ Search in the web; ▶ Go to specific website; ▶ Play videos on YouTube; ▶ Start applications; ▶ Start or search for programs; ▶ Open a file or folder; ▶ Play or pause media; ▶ Execute a command; ▶ Start a program; ▶ Open a text or document; ▶ Print a document; ▶ Open the Start menu; ▶ Launch the control panel; ▶ Find a program, open it, or run it; ▶ Open a folder; ▶ Open a folder or folder in a program; ▶ Open a folder in another program; ▶ Run a folder; ▶ Go to a location; ▶ Delete a file; ▶ Search for a file or folder; ▶ Copy a file or folder; ▶ Download a file or folder;
