Pathfinder: X-Plane 11.. You will be unable to simulate Boeing 737-200 after 11.09.15 build. This aircraft did not appear in the original X-PlaneÁ . Simulation Reference by FlyjSim. PDFA screw feed valve for introducing a dirty and solids-laden fluid such as sewage into a treatment tank is known, for example, from EP-A-0 511 349. This valve has a first feed channel and a second feed channel, the first feed channel being arranged to receive the contaminated fluid from a first inlet and the second feed channel being arranged to receive the fluid from a second inlet. The valve comprises a plurality of component parts which are preferably made of plastic material. There is a danger that the component parts may become detached from the valve body when the valve is assembled, possibly creating a leak path. Furthermore, a disadvantage of the valve is that separate seal rings and their corresponding threading are required for each inlet to the valve. A screw feed valve for introducing a dirty and solids-laden fluid such as sewage into a treatment tank is known, for example, from WO-A-91/18049. The valve comprises a first and a second valve body and a shaft arranged therein. The shaft has a first threaded end for engaging a corresponding threaded opening in the first valve body, and a second threaded end for engaging a corresponding threaded opening in the second valve body. Between the first and the second valve body there is arranged at least one inlet. A disadvantage of this type of screw feed valve is that there is a danger that the component parts may become detached from the valve body when the valve is assembled, possibly creating a leak path. A further disadvantage is that due to the manufacture of the valve it is not possible to easily replace worn parts. It is an object of the present invention to provide a screw feed valve which overcomes the above mentioned disadvantages./* * Copyright 2016 Red Hat, Inc. and/or its affiliates. * * Licensed under the Apache License, Version 2.0 (the "License"); * you may not use this file except in
