Need more female voice lines to make your cutscenes a bit more interesting? Then take a listen to Japanese School Girls Vol.6! TK Projects' newest sound effect pack brings you 245 SEs from a professional voice actress to help breathe life into your characters. Covering all sorts of emotions, this pack is perfect for a school girl with a calm personality. Have your class president greet other students with a happy hello or wish your player a good day when school ends. If your player is a troublemaker who refuses to follow the rules, then your class president could reprimand them with a few angry lines. This pack includes a pdf that covers the English and Japanese meanings of every SE, making it easier for you to know which track to use no matter the situation. Even if the included lines don't quite fit your scenes, the

selection of breaths and sighs can add to the emotion of the dialogue without distracting from what your character says. Give your sweet characters a matching adorable voice with Japanese School Girls Vol.6! Features: * 245 SE covering a wide variety of expressions * OGG and M4A file formats included Terms of Use: * This pack is for use in RPG Maker Series or the engine of your choice. * OK to be used in Commercial projects * OK for use in games with gore * OK for use in adult-rated games Description: Description: This pack contains 19 Japanese Voice Lines, in English and Japanese. Following are some possible languages that could be included with this track: Japanese Chinese French Italian German Portuguese Russian Spanish This text was generated by a text to speech program. CUR3D is a free 3D game engine that allows for the real time rendering of 3D scenes. It also offers a wide range of tools and a rich set of 3D objects and materials, which you can use to create your own scenes or simply place 3D models from other sources into your 3D scene, then render it. CUR3D also uses a powerful feature called "constraints", which allows you to place 3D models in 3D space where you can place soft-bodies like people and robots, and they will act as if they were attached to you body. With CUR3D, you can import a wide range of 3D models into your 3D scenes and get new scenes in a few seconds. Also,

CUR3D is fully compatible with both the XNA and MonoX servers, so you can share your work with the world. Key features: * RENDERING: Create photorealistic 3D scenes. * USING 3D MODELS: Import 3D models from a wide range of tools (see the standard set of CUR3D tools in CUR3D/assets/tools. In addition you can add a wide range of tools and scene improvements (such as the ability to hide certain scene elements when rendering) as well as scene presets. * PLACING 3D MODELS IN SCENES: You can place a wide range of 3D models in a scene by importing them from any of the standard CUR3D tools or from external sources. You can position multiple models in a scene using constraints (scene presets). * CREATING SCENES: Create a new scene with a simple GUI. In addition, you can position cameras on the scene and use a wide range of constraints for placing different objects on the scene. * EDITING

SCENES: You can edit the properties of your scene, enable and disable scene elements, and create multiple scene elements with constraints and masks. Scene elements can be moved, scaled and rotated in real time. * GRAPHICS AND TEXTURES: You can use a wide range of graphic and texture presets to create your own scenes and place objects and materials into scenes. You can also use other graphic and texture presets that are part of the standard set of CUR3D tools. * 3D MODELS: You can import a wide range of 3D models into your scenes: from anime, creatures, weapons, vehicles and furniture (in both DXF c9d1549cdd
