Toolbars Photoshop comes with a number of useful toolbars that can be moved around on the screen in different positions to quickly access and change your work. You can find these toolbars on the top, bottom, left, and right sides of the Adobe Photoshop workspace. These toolbars are also very useful for sketching or designing graphics. This toolbar has four window buttons that are useful for positioning and resizing images: * **Move:** Drag the tool to the position where you want to place the graphic. * **Rotate:** Click the rotation tool to rotate the graphic clockwise or counterclockwise. * **Arrange:** Click to move a layer, resize the layer, resize the entire image, or scale the layer up or down. * **Reset:** Resets the current position to the center of the canvas or the last default position. The following Image menu items are also useful: * **Image Size:** Pops up the Image Size dialog box to quickly change the image size.

The Healing Brush and Spot Healing Brush are brush tools that allow you to heal small parts of your image. The Spot Healing Brush does a better job than the Healing Brush when it comes to removing unwanted lines in your image. It's also good for removing spots of unwanted color. The Smudge Tool is used for brushing away fine lines or scratches. The Smudge Tool can also erase an unwanted object such as a stalk of grass or pet hair. The Magic Wand Tool is a brush tool that allows you to select areas based on color or on specific colors. The Quick Selection Tool helps you select the areas of your image and then copy them. The Lasso Tool is used for making selections by drawing around objects. You can paint with the Lasso Tool to remove unwanted elements from an image and then add in the new elements. The Pen Tool can be used for drawing objects or lines. Depending on how you use the Pen Tool, you can create different effects. The eraser allows you to erase portions of the image. The Eraser can either be used with a brush or with a dry erase marker. The Refine Edge feature in Photoshop allows you to sharpen the edges of your image. The Perspective Correct Tool is used for aligning objects in perspective. The Drop Shadow tool is used to add a shadow around any object. The Eraser Tool is used for removing objects from the image. The Move Tool can be used for dragging around objects in the image. The Rotate Tool allows you to rotate objects. The Fill Tool allows you to fill an image with color. The Spot Healing Brush allows you to copy pixels from one area of an image and paste them into another area.
