
Fba Next Pack Roms

Good idea, and that's a feature that we need to improve as well. If you like I'll use your suggestions to increase the ROMs in the C64 and Spectrum platforms, and we'll see what we can do with the Amstrad CPC. When Android Nougat was introduced and more power saving options started to arrive, Android 7.0+ became a beast that could be quite demanding for the processor. Therefore, many newer devices could easily max out the limited 8GB of internal storage with installing the default apps and some games. As more apps were being added to Android O, the storage space for applications grew even more. This is why not many users want to install beta ROMs on the latest versions of Android that can easily eat up 1-3GB of internal storage on users' devices if they don't have enough free space. Fortunately, there's a solution for this issue called Partitioning. Unfortunately, not many phones will have this option, and rooting them is out of the question for most of them. The only way out is to jailbreak your phone and install a custom recovery. With a custom recovery, you can actually partition the internal storage of your phone. It's highly recommended for most people to do this if you want to utilize all of the space available on the phone (even to the point of installing ROMs). XDA Recognized Developer ' Haloz987 ' has an archive for FBA ROMs based on the FBA Next Pack ROMs. The original FBA Next Pack ROMs are based on a custom ROM with a modified SuperSU and FBA support. The modified SuperSU is based on SuperSU version 4.x and has additional commands for the FBA lib. This includes some workarounds to deal with the problems that sometimes arises due to the FBA lib. You can read some more details in this thread
