Windows 7 comes with a number of built-in utilities that are important to the functioning of your system. As of now, the list includes Windows Spotlight which helps you find the files and folders stored on your hard disk easily, and BitLocker Drive Encryption which helps you encrypt your hard drive in order to prevent the data stored on it from getting stolen. In addition, you can also use Password Recycler to recover your forgotten passwords, and Windows Backup which enables you to create recovery DVDs for backing up your valuable files, in case your hard disk gets destroyed or stolen. In this article, we are going to discuss the usefulness of Microsoft BitLocker Drive Encryption utility and how it can make your computer more secure. How BitLocker Drive Encryption Utility Works: BitLocker Drive Encryption is a new feature that is available in Windows Vista and Windows 7. It is basically an online data storage solution that enables you to encrypt any data that you want to store on your hard disk, and also enables you to use this data remotely. BitLocker Drive Encryption Utility: BitLocker Drive Encryption utility is not installed automatically by Windows Vista or Windows 7. In order to make this program work on your machine, you need to download and install the application from the official website of the Windows Live website. Once you have installed the BitLocker Drive Encryption utility, you can use it to recover your forgotten passwords or recover lost data from your hard disk. In order to begin using this program, you need to access the main menu and click on the Backup option. From there, you will be able to create a recovery disc. Once you click on the Create button, the utility will open the Backup Wizard, which enables you to select a location for your recovery disc, and also enables you to select the recovery data that you want to back up. You can also use this utility to retrieve your forgotten passwords. However, in order to do so, you need to follow the steps below: After you have installed the program, you will be able to access the main menu of the program and click on the Password option. Under Password Options, you will be able to choose the account that you want to recover and click on Next. Once you have set the recovery data that you want to restore, you can click on Next and then on Finish. You will then be able to access the Password Utility window which will display all your important
